SUMMARY

I am Mark Raphael D. Nuguid, an adaptable and efficient Web Developer specializing in React and Next.js. With extensive experience in creating bespoke web applications and websites for marketing and other purposes, I leverage a wide range of technologies, including various backend stacks, to deliver optimal solutions.

WORK EXPERIENCE

Web Developer Intern, Center for Kapampangan Studies

Sept 2022 - Feb 2023

- Developed the web app Kapampangan translator
- Created CMS to manage the Kapampangan translator contents
- Managed the applications content

Freelance Web Developer

Jan 2021 - Dec 2023

- Developed and maintained responsive front-end applications using React.js
- Created responsive web applications and management systems using PHP, Laravel, and React.js, enhancing functionality and user experience across various projects.

Web Developer Volunteer, Center for Kapampangan Studies

Sept 2022 - Present

- Developed Minindal, a web application that aims to streamline search for authentic Kapampangan cuisine built with React JS and Laravel.
- Created a CMS for the web application and managed contents

Web Developer, Fullstack HQ

Aug 2023 - Present

- Collaborated with cross-functional teams to develop and maintain a diverse range of projects, including marketing sites, mobile applications, Shopify projects, and custom web applications.
- Implemented responsive, SEO-friendly interfaces for marketing websites, creating reusable components and adhering to best practices for accessibility and development.
- Integrated third-party APIs and platforms such as HubSpot, Google APIs, CMS, and Xano into custom web applications to enhance functionality and meet specific client requirements.
